Emergency CallWorx® and Hitech Systems® Announce Strategic Partnership

Hitech to Offer Next Generation 9-1-1 from Emergency CallWorx

Madison, AL, February 10, 2009 – Emergency CallWorx (ECX) announced today that it has formed a strategic partnership with Hitech Systems, a leading provider of public safety software solutions. The partnership will provide Hitech with a Next Generation 9-1-1 and Voice over Internet Protocol (VoIP) solution.

Next Generation 9-1-1, supporting new telephony and communication technologies, requires far greater integration between 9-1-1 telephony and Computer Aided Dispatch (CAD) applications than the decades-old integration provided by the original AT&T/NENA CAD interface standard. This industry leading system architecture will lower total cost of ownership (TCO) and yield higher return on investment (ROI) for all agencies.

Henry P. Unger, president of Hitech said, “As there is no CAD vendor that supports its offerings on more operating systems platforms than Hitech, we needed a vendor-neutral, standards-based, platform-independent 9-1-1 telephony solution. ECX’s offering fits that requirement, as well as offering an extensible, forward-looking architecture well suited for the technological advances of tomorrow.”

“We are very proud to have Hitech Systems as an Emergency CallWorx partner. Hitech Systems is a highly respected public safety solutions provider throughout the US and Internationally for nearly three decades. Their highly reliable, cost effective solutions align perfectly with the forward thinking ECX Next Generation 9-1-1 call taking solution,” stated Craig Dollar, founder and CEO of Emergency CallWorx.

About Emergency CallWorx

Founded in 2007, Emergency CallWorx, a division of CLJ2, Inc., provides the PSAP and Dispatch community with the industry’s first truly-integrated solution for receipt of Next Generation 9-1-1 call-taking, dispatching of resources, and transmission of critical information to the mobile workforce while providing a vast array of benefits from VoIP technology. Emergency CallWorx products improve control and administration of the E9-1-1, Emergency Management and Dispatch workflow process while enhancing the speed and accuracy of emergency response.
